

# GrapeCity's ActiveReports and FarPoint Spread Products Provide Full Support for Visual Studio 2010

*All .NET spreadsheet, reporting and business intelligence products released with full support for Visual Studio 2010.*

Kirkland, WA—April 28, 2010— [GrapeCity](#), the world's largest component vendor for the Microsoft .NET framework platform and a Visual Studio Industry Partner, today announced full support for Microsoft Visual Studio 2010 in all .NET spreadsheet, reporting, and business intelligence products that are part of its award-winning PowerTools line of products.

[FarPoint Spread for Windows Forms 5](#) is the world's best-selling, award-winning Microsoft Excel-compatible .NET spreadsheet component. Spread now supports the Visual Studio 2010 .NET Framework 4.0 Client Profile.

[FarPoint Spread for ASP.NET](#) is the world's best-selling, award-winning Microsoft Excel-compatible ASP.NET spreadsheet component. The current version, 4, already supports Visual Studio 2010, and the upcoming version, 5, provides built-in support for the Visual Studio 2010 Azure Development Fabric.

[ActiveReports 6](#) is an award-winning .NET reporting tool and comes with full design-time support in the Visual Studio 2010 IDE including support for the .NET Framework 4 Client Profile. ActiveReports 6 now includes support for Microsoft Windows Azure cloud services in full trust mode, granting access to the benefits of using this platform.

[Data Dynamics Reports](#) is a new business reporting tool for .NET that supports and enhances the Microsoft SQL Server Reporting format and allows developers to embed dashboards and Key Performance Indicators (KPIs), and offer Microsoft Excel transformations. It now supports Visual Studio 2010 and the new .NET Framework 4 Client Profile.

[Data Dynamics Analysis](#) is the first free-form .NET data visualization component for Microsoft Visual Studio. The latest release fully supports Visual Studio 2010.

Commenting on GrapeCity's new releases, Rick Williamson, General Manager of GrapeCity's PowerTools Division, said, "We are very excited about Visual Studio 2010 and the next generation development platform from Microsoft as it aims to simplify the entire development process from design to deployment. GrapeCity's powerful, functionally rich, industry leading spreadsheet, reporting, and business intelligence products allow developers to go beyond basic functionality and unleash real business value without compromising performance and quality."

## About GrapeCity
